Better quality of life begins here.

Our mission is to provide high quality, affordable healthcare services, allied social services and health education in a safe and caring environment.

Regardless of race, economic status, age, gender, or sexual orientation, we are responsive to the needs of the community, especially the underserved, uninsured, homeless and those without access to care.

Better quality of life begins here.

Our mission is to provide high quality, affordable healthcare services, allied social services and health education in a safe and caring environment.

If you have a health concern, or simply feel it's time for a checkup, your ability to pay should not stand in the way of getting the healthcare you need.

Horizon Health Center, a federally qualified health center with two locations in Jersey City, can help.

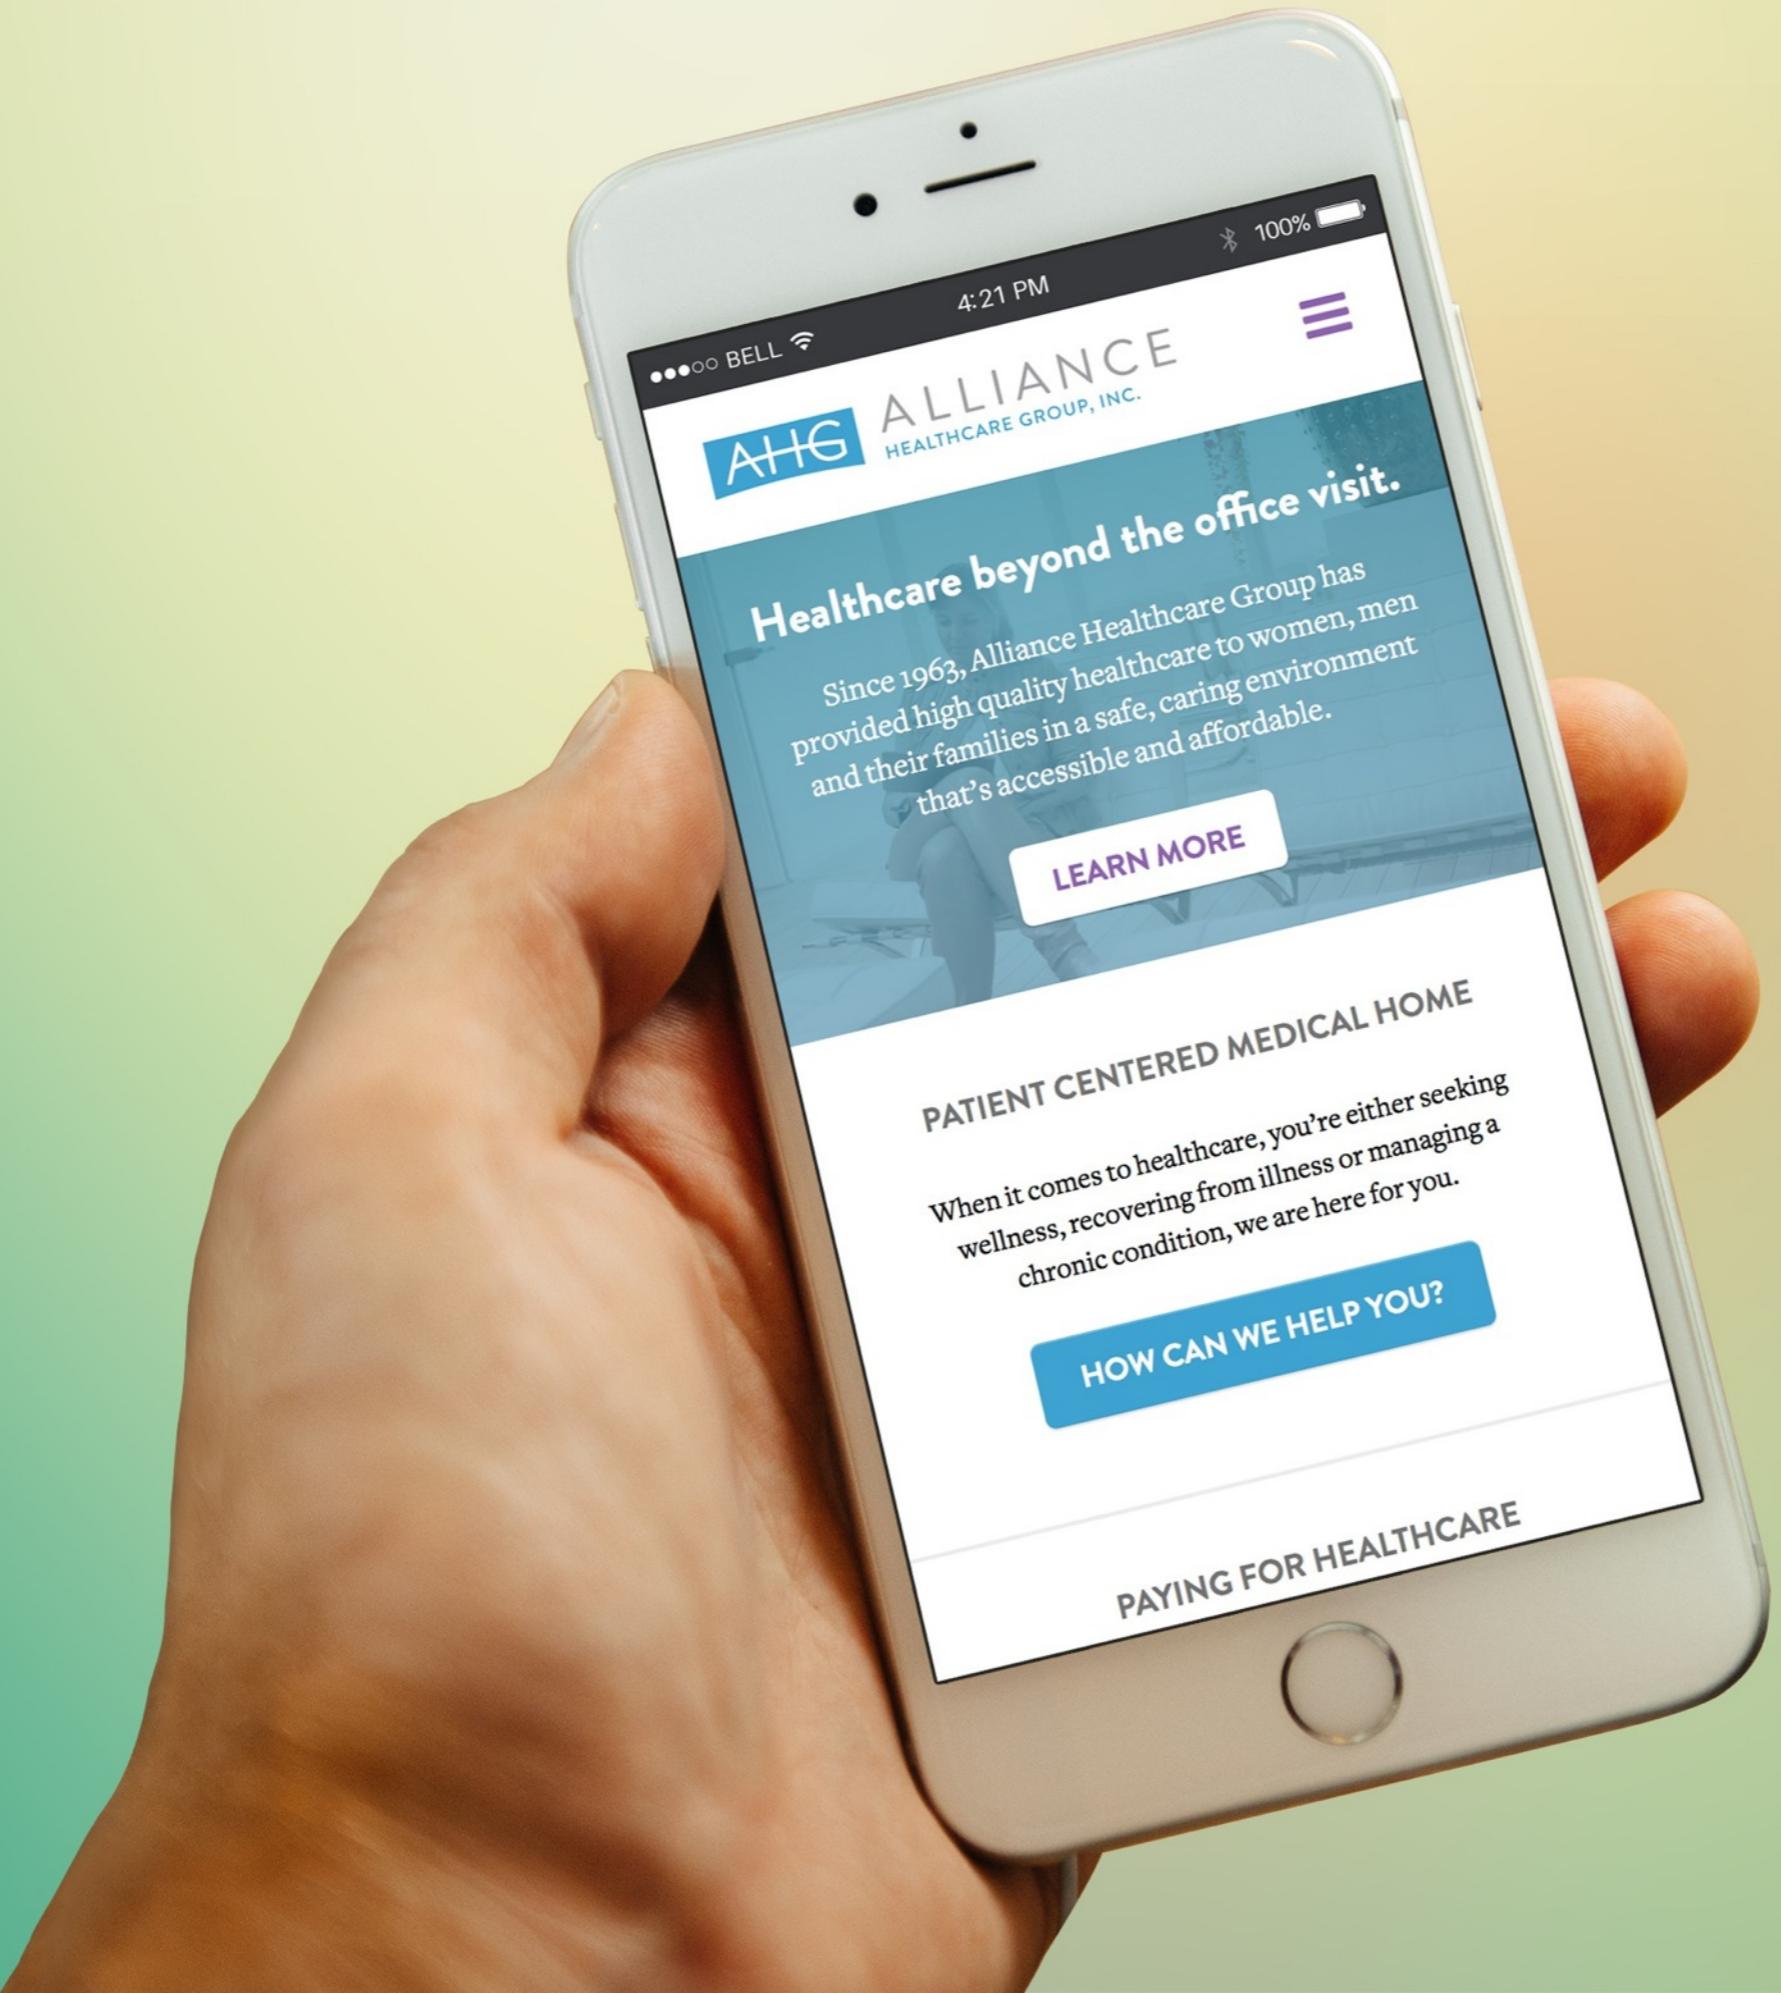

Since 1963, Horizon Health Center has provided high quality healthcare to women, men and their families in a safe, caring environment that's accessible and affordable.

Each year, more than 19,000 individuals entrust us to meet their medical needs, from primary care, OB/Gyn screenings and maternity care, to pediatrics, mens care, dental services, integrated medicine, and more.

With more than a half-century of experience serving Hudson County families, we know that health problems never happen in isolation. Stress, lack of income, poor nutrition, environmental factors, and the emotional trauma of homelessness or foster care, play a critical role in your physical health. That's why all of the healthcare services we offer are "patient-centered" and individualized to your personal circumstances.

Our diverse medical staff reflects the racial and cultural makeup of the community we serve, and more than 30 languages spoken at our Centers (collectively). We get great satisfaction in communicating with our patients in a way that builds trust, improves compliance and achieves more effective treatment plans. That's why we entered the healthcare field in the first place. We hope you entrust us with your care.

Dr. Michael McNett, MD
Medical Director
